## **EGYPTROL announces the completion of Sidi Krir PP CP-117 and CP-118 warrantee contract**

EGYPTROL (Egypt Engineering Services, S.A.E) announces the completion of the last contract in its work scope at Sidi Krir power plant after consecutive sub contracts with Toyota Tsusho Co. (TTC) / Toshiba Plant Systems and Services Corp.(TPSC) that started in 2009.

The work scope commenced with a lump sum contract for conducting Balance of Plant (BOP) equipments and system commissioning activities effective 1<sup>st</sup> of April 2009. As a result of TTC/TPSC satisfaction, EGYPTROL was awarded a number of contracts for providing services in field instrument calibration, procurement support, plant operation and commissioning support for the project in both simple and combined cycle phases.

EGYPTROL completed the contract until turning over the plant to the owner which resulted in the awarding of the last contract for conducting all site activities related to the two years warranty scope for both CP-117, CP-118 that ended at 31<sup>st</sup> of July 2013.

Sidi Krir PP located at Mediterranean Sea Coast, Alexandria City, produces 750MW through two CTGs, two HRSGs and one STG.
