- Employer** : RSE Company for Petroleum Services
- Projects** : South Surra Tunnel Project & Rain Drainage Project in Abdali – Kuwait:
The tunnel belongs to a major company specialized in tunneling works called Afcons Company, and since we have done subcontracting work for the company with concrete and insulation works, where the tunnel consists of 25 bases called panels. Excavation is done first for a certain area of panels, then a support is made for the sides of the excavation, and then the necessary compaction of the soil is made. And there were places with piles where the piles were made, then the regular and reinforced concrete works, then the walls, then the upper and lower parriel according to the approved plans.
As for the Abdali Project, it is about water tanks in which rain water is collected, then a rain drainage network was made from the tanks even outside the existing work area by making rain drainage channels with design inclinations on the sides of the road and rain drainage pipes of different diameters that are used only at the occurrence of any intersection in the road with the presence of the necessary inspection rooms for that, as the work was done in accordance with the executive plans approved by the company.
