CHRONOLOGICAL EXPERIENCE RECORD

Dates : From 2018 till 2019
Employer : Ayman Khairy Office
Job title : Construction Engineer
Job Description :

- 1st Project:
 - The project was about repairing a villa consisting of three floors by detection of rust in various areas, which was removed using sand blasting machine, and reconstruction of treated areas.
 - My role was to supervise and give tasks to the workers to make sure work is done on time without any delay according to the time schedule.
 - I was also required to make sure that the required quality is achieved during the project, by approving the materials used in the

site and making sure it conforms the specifications, in addition to safety of workers in the site.

- 2nd Project:

- The project was about construction of a villa consisting of two floors which includes the (plumping - electricity - plastering - painting) work according to the drawings and in the required time.
- My role was to manage the work done without any delay which may lead to lag in critical path of the project, also I was asked to make sure that the supplies needed existed and ordered previously.
- I was asked to revise the drawings and make sure it matches the specifications and laws stated by the engineering authority of the armed forces.
