- Employer** : Al-Futtaim / Carillion
- Project** : The Cairo Festival City (CFC) project site is located at New Cairo City, edged by Cairo ring road and the New Cairo main street.
- Job title** : Senior HSE Advisor
- Job Description** :
 - Directing project HSE activities and providing leadership to promote a positive culture within the team.

- Provide a project framework for managing HSE - systems and standards.
- Assist staff and contractors in compliance with relevant legislation, client standards and contractual arrangements, and ensure staff and managers safety.
- Advise management on:
 - Preventing injury to personnel and damage to plant and equipment.
 - Improvements in existing work methods.
 - Legal requirements affecting health, safety and welfare and the adequacy of facilities provided.
 - Provision and use of protective clothing and equipment.
 - Suitability, from a SHE viewpoint of plant and equipment, articles and substances, and the validity of all appropriate test certificates and safety information. Give advice on the adequacy of the foregoing items, and whether they comply with all statutory requirements.
 - Potential hazards arising from new contracts before work starts, and on the site SHE organization, arrangements and fire precautions required.
 - Methods of safe working especially those arising from new developments.
 - Changes in legislation.
- Assist as necessary during tendering, planning and pre-contract stages to advise on all safety, health and welfare matters and pre-contract training requirements.
- Carry out safety inspections and where appropriate audits in conjunction with appropriate management to see that statute, codes of practice, method statements, risk assessments and company HSE arrangements are complied with, and that only safe plant, equipment and methods of work are in operation. Advise appropriate management of the results of these inspections verbally and/or in writing to include hazards seen, good/bad features and overall conclusions. As appropriate monitor the action taken as a result and report to the appropriate level of management.
- Advise project personnel and site management on the determination of safe methods of working and systems to identify hazards and unsafe situations. Advise upon the production of written method statements and site SHE rules and on the arrangements to bring these to the attention of the workforce.
- Investigate accidents and dangerous occurrences and recommend means of preventing recurrence.
- Adherence to the Group and company HSE reporting procedures.
- Assist with the identification of training requirements and subsequent training for all levels of employees. Monitor recording of such training.
- Suggest methods and aids to promote awareness of injury prevention and damage control.
- Keep in contact with official professional bodies involved with safety at work.
- Keep up to date with HSE legislation, codes of practice and new SHE literature and circulate information applicable to each level of employee.
- Liaise with group and company safety and environmental controllers with regard to accidents, and precautionary measures implemented within the company/group.

- Foster within the company an understanding that injury prevention and damage control are an integral part of business and operational efficiency.
- Functionally report and respond to the company safety and environmental controller.
- In conjunction with the company safety and environmental controller, update the company SHE policy when required and advice on its application and effectiveness.
- Immediately notify the group safety and environmental controller and the company safety and environmental controller of any prosecution or incident likely to result in issue of improvement or prohibition notices or prosecution.
